Hi Mike,

I was looking this over after I sent you the email earlier today. How does the following statement affect what you would like to do?

- economic models developed under ESRP (Messer, Wainger and others). Focal communities include agricultural townships (Calapooia watershed in the Willamette Valley), forest communities in the Willamette's Cascade Range (Blue River, OR among others), and a PNW coastal communities (tbd).

Are you involved with using the economic models mentioned? Are the focal communities ones you could do economic analysis for concerning changes in ecosystem services? Just ideas.

Thanks, Dave

Marc,

Here is a revised update for Willamette/PNW along the lines that Rick requested.

Subject: A few translations

Thanks for sending in your Q1 task updates for me to put together our Project update on today's RAP call.

Rick sent the following few points for us PAL's to report on:

In particular, I would like to hear a bit about what you have been doing but focus on:

How do your tasks provide you as a PAL the information to meet the topic goal.

How you will be helping Omocote, Alabama and Bigloski, Texas become more sustainable--what do you bring to the table to allow the communities to become more sustainable

How your work will help in balancing environmental, societal, and economic elements of sustainability
How your work relates to the others in your project/theme and to theme 4 need
Are you working in the field, and if so, where and do you have a solid regional contact engaged in the work.

Could you take a look at the info you sent me and organize/modify them to fit the above questions?

I present this at 1 PM CST today so if you don't get to this I will be working on organizing what you have sent to answer Ricks questions.

Marc
